DIGITAL EQUIPMENT CORPORATION

FACT SHEET

Product Name: ALL-IN-1 STARTER Version 2.4 for VMS

Function:

ALL-IN-1 STARTER is a low-cost set of primary ALL-IN-1 office services -- including Electronic Messaging, Document Processing, File Cabinet and file cabinet management, and system management utilities -- that supports video terminals and the power of PCs. At 50% of the price of a full ALL-IN-1 system, ALL-IN-1 STARTER is an option for customers that want an enterprise-wide electronic messaging and document processing system, or that are introducing office information technology into their organization. As an organization's needs expand, ALL-IN-1 STARTER can be upgraded to a full ALL-IN-1 system.

The ALL-IN-1 STARTER system utilizes Digital's MAILbus for Distributed Directory Services (DDS) and multi-vendor mail exchange with users of ALL-IN-1, IBM PROFS and SNADS, MCI Mail, TELEX, UNIX, and other X.400 systems.

ALL-IN-1 STARTER is fully compatible with the ALL-IN-1 system; all data, training experience, and system management are transferable from one system to the other.

Key Enhancements:

- o ALL-IN-1 STARTER Version 2.4 for VMS includes the identical interface as ALL-IN-1 Version 2.4, and includes many of the ALL-IN-1 system's key enhancements, including:

Server Capability for PC Desktops

- o For client/server ALL-IN-1 implementations using the new ALL-IN-1 DESKtop for MS-DOS.

Support for CDA (Compound Document Architecture) Documents

- o DDIF (Digital Document Interchange Format) documents can be stored directly in the ALL-IN-1 File Cabinet, and can be read, edited, printed, and mailed to other users anywhere on the network.

WPS-PLUS Version 3.1

- o Providing enhanced paragraph numbering capabilities.

End-User and System-Management Enhancements

- o End-user print and batch queue management capabilities, and simplified license management for easier system management.

-more-

Hardware Requirements:

- o ALL-IN-1 STARTER Version 2.4 for VMS runs on the same range of VAX computers as the ALL-IN-1 system, from desktop MicroVAX systems to VAX 8900 multiprocessor computers and VAXcluster system configurations.

Software Requirements:

- o VMS Operating System Version 5.1 or later
- o DECnet-VAX software is required for network support

Pricing and Availability:

- o Personal License (for four persons): U.S. $1,248
- o System License: from $4,338 for the MicroVAX 3100 system (supporting 88 video-terminal subscribers) to $68,678 for the VAX 8978 system.
- o ALL-IN-1 STARTER Version 2.4 for VMS will be available in the U.S. in April, 1990.
